IN SHORT

Light Carving

From Jaipur, India comes a new collection of lighting entitled Marble Lights from ROOSHADSHROFF. Each product is hand-carved from a single block of white Makrana marble and hollowed out to a six-millimetre thickness. The exterior of each light is carved with a different pattern and, as the marble is thin enough to allow light to pass through, the form is illuminated. ROOSHADSHROFF is renowned for its many collaborations with Indian artisans, such as marble inlay specialists in the city of Agra; embroidery sourced from Mumbai and Lucknow; and, for this collection, marble carvers in Jaipur.
