Inspired by the vivid patterns of Fordite, an agate-like enamel which is a by-product of the automotive industry, this side table was coated with eight different layers of paint, then sanded at various intensities, allowing for its various layers to be revealed.

Part of the C-Series collection, the C-Side table pushes the boundaries of woodwork by taking on a cantilevered form. Devoid of screws, metal fasteners or power tools, the handcrafted individual segments make use of exquisite traditional joinery in recycled old Burma teak wood, thereby addressing issues of sustainability pertaining to both resources and craftsmen. Each piece is individually signed with an inlay of hand-cut brass. A complete knockdown construction allows for the chair to be disassembled with ease, thus facilitating easy transportation and re-assembly.
